ABOUT US

1939 - Naso (Sicily)

Our business began between the 20s and 30s in Sicily, in Naso, a little town in the province of Messina, as a small family-run business operating in the marketing and sale of olive oil and Nebrodi hazelnut. In 2017, came to the third generation, our business became the Brontese by Naxida.

Throughout the years, we have expanded our business activity and our product references, while preserving our original family soul as well as the quality of the products that has always set us apart.

The main focus of our production

Today, in addition to our own production of Sicilian Pistachios, Hazelnuts and Almonds, our pistachio groves located on the slopes of Etna Volcano, in Bronte, Catania, at 800m height above mean sea level, are the main focus of our production.

Our pistachios groves, located in Bronte, are cultivated exclusively with plants of the white variety or so-called Neapolitan, the queen cultivar of Bronte. The volcanic soil as well as the typical weather conditions, characterized by hot summers and harsh winters, make the ideal habitat for the production of the best pistachio in the world.

After over two centuries of experience and ancient traditions handed down from father to son, including cultivation techniques, care in harvesting and skill in processing, our small family-run farm have obtained the prestigious "Pistacchio Verde di Bronte D.O.P." certification. This certification guarantees the customer, who purchases our certified products with Pistachio Verde di Bronte, 100% authenticity, quality and unique taste that characterized the real Pistachio of Bronte.

In this scenario full of colors, flavors and fragrances, our company has got specialized in sustainable cultivation, respecting the environment. The control of the entire supply chain allows us to follow all the stages of the production process, to ensure the highest quality products.

COMPANY CERTIFICATIONS

The Naxida Azienda Agricola has always been attentive to quality and environmental sustainability issues, for this reason we adopt strict production protocols and make use of the most qualified technical assistance with several and accurate controls directly on the field of production. We periodically carry out chemical-physical analyses of the soil, leaf analyses, as well as the analyses of irrigation water and accurate analyses of the products obtained.

These important certifications place NAXIDA at the same level of the best national and European companies in the production of the high quality agricultural products.

The flagship among our spreadable creams. Handcrafted exclusively with fine pistachios from Sicily, free from preservatives and artificial colors. It stands out for its unique flavor and genuine taste. Sicilian Pistachio Spread is excellent for sweet cake fillings and toppings or simply to spread on a slice of bread. A treat to enjoy at breakfast served with a good coffee. Essential product for pistachio lovers: intense, creamy and irresistible!
